

luxcore

with vigor edge zoned

Our Luxcore spring units are made locally in Willowbrook, Illinois, with American 100% recycled steel wire.

28% COOLER & 26% MORE DURABLE THAN FOAM

Luxcore springs sleep up to **28% cooler** than foam does to increase airflow and are **up to 26% more durable** than foam cores.

Luxcore w/ Vigor Edge Zoned

A **superior sleeping edge** compared to a foam encasement; by The Beloit Mattress Company, a **factory-direct** mattress co.

Vigor Edge Zoned reduces the roll-off feeling & provides a consistent sleep surface.

The Luxcore Vigor Edge Zoned helps a mattress sleep cooler with better edge ventilation.

Luxcore spring units are designed for maximum pressure relief and support.

The encased coils that form the units interior provide an even, contouring surface that absorbs partner movement & prevents them from rolling together.

Luxcore provides more support than a foam core and **better ease of movement** on the bed for increased energy return.

Luxcore spring units are ideal for platform beds, foundations, and adjustable beds.

Our premium 8" Luxcore provides maximum comfort and support.

The **8" Luxcore with Vigor Edge Zoned** features 1.57 mm wire on the outside, three rows of narrow diameter edge coils 1.83 mm wife in the head/foot section and 1.38mm wire in the center section.

SIZE	HEIGHT	COILS
