

# luxcore

with vigor edge

Our Luxcore spring units are made locally in Willowbrook, Illinois, with American 100% recycled steel wire.

**28% COOLER & 26% MORE DURABLE THAN FOAM**

Luxcore springs sleep up to **28% cooler** than foam does to increase airflow and are **up to 26% more durable** than foam cores.

## Luxcore with Vigor Edge

A **superior sleeping edge** compared to a foam encasement; by The Beloit Mattress Company, a **factory-direct** mattress co.

Vigor Edge reduces that roll-off feeling and provides a consistent sleep surface.

The Luxcore Vigor Edge helps a mattress sleep cooler with better edge ventilation.

## Luxcore spring units are designed for maximum pressure relief and support.

The encased coils that form the units interior provide an even, contouring surface that absorbs partner movement & prevents them from rolling together.

Luxcore provides more support than a foam core and **better ease of movement** on the bed for increased energy return.

## Luxcore spring units are ideal for platform beds, foundations, and adjustable beds.

Our premium 8" Luxcore provides maximum comfort and support.

The **8" Luxcore with Vigor Edge** features 1.57 mm wire outside, three rows of narrow-diameter edge coils, and 1.83 mm in the center coils.

SIZE	HEIGHT	COILS
TWIN	8"	738
TWIN XL	8"	756
FULL	8"	996
QUEEN	8"	1148
KING	8"	1461
